Profile

Product Owner with 6+ years delivering complex, data-driven products in regulated, enterprise environments. Responsible for delivery across the full sensor product portfolio, covering data, software, and operational readiness. Accountable for CHF 1.6M ARR, delivered CHF 1M cost savings and supported CHF 4M in new contracts.

Skills

Product ownership & delivery, roadmaps, prioritisation
Cross-functional coordination across engineering, data, and operations
Data platforms & APIs, release and operational readiness
SQL & Python, KPI dashboards, anomaly detection
Regulatory & compliance support for enterprise products

Experience

Nexxiot AG, Product Owner (Sensor Portfolio)

Zurich, Switzerland | Jan 2024 – Present

Portfolio-level ownership of sensor products with a 12–18 month execution horizon.
ML-based event classification delivered to production, reducing false positives by 90% and saving CHF 1M annually.
Improved system reliability and fleet performance through monitoring and KPI-driven analysis.

Nexxiot AG, Product Owner (Sensor Data Pipeline & Applications)

Zurich, Switzerland | Jul 2020 – Dec 2023

End-to-end ownership of the sensor data pipeline from device ingestion to customer-facing applications.
Backlog ownership and delivery alignment for an interdisciplinary agile team.
Operational and customer KPIs introduced to improve transparency and response.
Delivery of a security-critical solution from requirements to production, supporting a multi-million-CHF enterprise contract.

Nexxiot AG, Solution Manager

Zurich, Switzerland | Oct 2019 – Jul 2020

Coordination of development and launch of a regulated, customer-facing product.
Interface between customers, engineering, and operations during early rollout.

Nexxiot AG, Project Manager

Zurich, Switzerland | Feb 2019 – Sep 2019

Establishment of foundational quality and information security processes.
Coordination of international logistics and compliant deliveries.
